 STEVEN F BOYD, MANAGER

**Qualified** contractors have access to a skilled labor pool of people who have been trained through joint apprenticeship programs. In today's highly technical construction industry market, properly trained craft people are a must.

**Qualified** contractors are stable. They are able to provide owners with a list of projects they have successfully performed and have a good reputation in the community and the industry.

**NECA** member contractors use only the best trained electrical and communications technicians available. And professionals do better work. Safer work. Electrical construction work that complies with NEC® and all other applicable safety codes and requirements.

Great Electrical And Communication Workers Aren't Born They're Trained

The finest industry workers in Alaska receive their training through the AJEAT Trust of NECA and IBEW. It's a model education partnership which produces the best-trained, most up-to-date apprentices and journeymen in the country.

All of the nearly \$1 million spent annually is privately funded.

UCW	Unlimited Commercial Wiring
UL	Unlimited Line Work
OC	Outside Communications
IC	Inside Communications
RW	Residential Wiring
