**QUALITY BEGINS WITH GOOD DESIGN...**

*It is accomplished with NECA Contractors*

**NECA** Contractors have access to a skilled labor pool that has been trained through joint apprenticeship programs. In today's highly technical construction industry, properly trained craft people are essential.

**NECA** Contractors are stable. They are able to provide customers with a list of projects successfully. Having a good reputation in the community and industry are a given, not a goal.

**NECA** Contractors use only the best trained electrical and communications technicians available. Additionally, state-of-the-art management resources and industry best practices are in place and utilized daily.

**NECA** Contractors do better work and safer work. Only work that complies with NEC® requirements and all other applicable safety codes and industry standards. Work performed on time, under budget, and without disruption.
