QUALITY BEGINS WITH GOOD DESIGN...

It is accomplished with NECA Contractors

NECA Contractors have access to a skilled labor pool that has been trained through joint apprenticeship programs. In today's highly technical construction industry, properly trained craft people are essential.

NECA Contractors are stable. They are able to provide customers with a list of projects successfully. Having a good reputation in the community and industry are a given, not a goal.

NECA Contractors use only the best trained electrical and communications technicians available. Additionally, state-of-the-art management resources and industry best practices are in place and utilized daily.

NECA Contractors do better work and safer work. Only work that complies with NEC® requirements and all other applicable safety codes and industry standards. Work performed on time, under budget, and without disruption.
